EDUCATION

Bocconi University, Milano, Italy September 2026 – Present
MSc in Artificial Intelligence
Relevant coursework: Software Engineering, Algorithms for Inference and Optimization, Computer Vision, Information Theory, Natural Language Processing
Associations: Bocconi Business and Arts (Vice President)

Bocconi University, Milano, Italy September 2023 – July 2026
BSc in Mathematical and Computing Sciences for Artificial Intelligence
Relevant coursework: Mathematical Modelling for Machine Learning, Algorithms and Data Structure, Advanced Programming and Optimization algorithms, Mathematical Analysis I, II, III, IV, Mathematical Statistics, Probability, Physics I, II,
Associations: Hephaestus Applied Artificial intelligence (Vice president, software developer, AI developer), Bocconi Business and Arts (events division and playlist curator), Bocconi Film Society (events division)

University of Wisconsin Madison, Madison, Wisconsin September 2025 – December 2025
Selected as an exchange student with a four-month scholarship.
Relevant coursework: Numerical Analysis, Quantum Physics, Stochastic processes, Game Theory and economic analysis.

Liceo Scientifico Marinelli, Udine, Italy September 2018 – July 2023
Math and Science oriented high school with advanced curriculum in natural sciences.
Obtained a final score of 100/100 cum laude.

North Broward Preparatory School, Coconut Creek, Florida, US August 2021 – May 2022
Attended a 1-year exchange program
Subjects: English, Concert Choir, Health, Hon Pre Calculus, Hon Physics, Personal Branding
APs: Music Theory, U.S. History, Computer Science

HONORS AND AWARDS

Albo Nazionale delle Eccellenze, Italy May 2023
Award given to high school students graduated with 100 cum laude

Design Award, Regional FTC Robotics Competition, South Florida, US February 2022
An award given to the participants who most successfully incorporated industrial design elements into the robot.

WORK EXPERIENCE

Machine Learning researcher at Bocconi University for the Computer Science department. Seprtember 2025 – present

Selected among the top 20 STEAM students at Bocconi to contribute to a research project on No-Backpropagation learning algorithms, collaborating with world-renowned experts in Machine Learning and Statistical Physics such as Marc Mézard and Riccardo Zecchina.

Machine Learning researcher and software developer at MIT CSAIL's Mantis AI. July 2025 – present

Worked as a Machine Learning researcher on Graph Neural networks and embedding theory at Mantis AI, a platform developed at MIT by MIT CSAIL and Kellis Lab. Mentored by Professor Manolis Kellis. (40 hrs/wk)

Research assistant at Bocconi University for the Computer Science department. April 2025 – October 2025
Worked with Professor Marek Elias and Professor Tommaso D'Orsi on a research project about theorizing a novel algorithm to perform Max Cut on several instances of graphs. (21 hrs/wk)
Software and AI developer and vice president (student association), Hephaestus Applied Artificial intelligence. October 2023 – September 2025

Worked as software developer in various ai-based projects such as “LLM for notary documents” and “ski maps”. For the latter, my job was implementing the shortest path on graphs’ “Dijkstra’s algorithm” on a graph-like model of a ski map. In September 2024 I was elected Vice President of the association.

Intern, Orionis Biosciences, Boston, MA, US (online) July – August 2022
Interned as part of the data science team for the American biotech company Orionis Biosciences; learned about pioneering technological innovation in genome-scale drug discovery and tunable molecular design of novel therapeutic drug modalities; analyzed proteins and their interactions using AI models that simulate PPI (protein-protein interactions) (15 hrs/wk for 6wks)

EXTRACURRICULAR ACTIVITIES

SwissHacks 2026, Zurich, CH June 20-21st, 2026

Built in 36 a real time AI assistant for cellphone calls that enables a private bank’s relationship manager (RM) access client’s informations while conducting a conversation. The project was made for Julius Bär and we had the chance to pitch it to the CEO.

SwissHacks 2025, Zurich, CH April 11-13th, 2025

Built in 36 hours an end-to-end AI working tool for personalized trend analyis of Swiss startups using NLP, K-NN and an LLM RAG at the end of the pipeline to yield a constructive report.

Participant, International Cosmic Day 2022, Trieste, Italy November 22nd, 2022
Selected amongst the best eight physics students at my school to participate at the international astrophysics conference on cosmic rays in Trieste; measured cosmic rays as a group activity and have a presentation about what was done on a zoom call with researchers from all around the world.

School Representative and President of Student Government, Liceo Scientifico Marinelli, Udine, Italy 2020 – 2021, 2022-2023
Represented the school’s student body (1600 students) during school councils; co-founded an interscholastic union of school representatives to co-operate in the organization of events and initiatives within our city.

Speaker, TedX Youth@NBPS Event, Coconut Creek, Florida, US April 2022
Researched, prepared, and held a TedX speech entitled “How Unpopular Math makes Popular Music”; discussed the presence and influence of mathematics in popular music.

Mechanical Designer, Eaglebotics Robotics Team of NBPS, Coconut Creek, Florida, US September 2021 – January 2022
Mechanical designer and competitions’ head driver for the official school team. (3/4 hrs/week)

Cybersecurity Competition “CyberPatriot”, Coconut Creek, Florida, US November 2021 – January 2022
Led my team to qualify in the “Gold Tier” (second tier out of three) out of more than 3500 teams at the CyberPatriot competition for the first three rounds; competed against thousands of teams from all over the world (2 hrs/week).

TechCamp PoliMi, Politecnico di Milano, Milan, Italy June 2021
Won a scholarship for the summer camp “TechCamp PoliMi” held in Politecnico di Milano and participated in the robotics course.

Introduction to Mathematical Thinking, Stanford University, US March 2021
Successfully completed online course of 42 hours (10 hrs/week); learned about the roots of real analysis and the different applications of mathematical thinking.

Participant, **European Union Science Olympiad, EUSO 2019 for Physics**, Udine, Italy November 2019 – January 2020
Ranked among the best 20 in the regional roster out of more than 150 talented students in my region (Trainings: 3.5hrs/wk)

ADDITIONAL SKILLS AND INTERESTS

Languages: Italian Native speaker; **English** Fluent (CAE C1); ; **Spanish** intermediate (B1); **German** Beginner

Coding skills: Python (NumPy, Pandas, Matplotlib, scikit learn, NetworkX, Pulp, LangChain, HuggingFace, cvxpy, Pytorch, Pytorch Geometric), Java, C, Matlab, R

Computer skills: LaTex, Power Point, Microsoft Excel, Microsoft Word, Google Docs, Google Slides, Google Sheets, terminal.

Other hobbies and interests: musician, cooking, tennis, skiing, sailing, journaling, writing.
